# About Applied Rating Index

**The Applied Rating Index is a data-driven report of current conditions and trends for Personal Auto and Personal Property insurance premium rates. Analyzing more than 1.3 billion quotes completed, the Applied Rating Index measures the increase or decrease in average Premium Rate trends across Canada.**

Representing more than 80% of the brokerage market and 675 insurer rating plans written by brokers, the Applied Rating Index is the most complete depiction of the Premium Rate trends being experienced by consumers, brokerages, and their insurers across the Canadian market.

To derive the premium index, Applied uses the average of the three best final premiums of each risk quoted. The data analyzed represents over 30 million quotes per quarter.

All data is fully anonymized when aggregating and analyzing the Applied Rating Index.
