

Managing Your Brokerage

Applied Commercial™

offers full-cycle
comparative
quotations for
SME products.

Applied's Commercial allows you to complete commercial insurance faster with standardised commercial lines processing.

Applied accounting facilities are available from Applied's Commercial panel, meaning that you can create diary entries, post premiums and cash for each type of business, and analyse the amount of business generated by each class of business.

By decreasing the amount of time you spend on policy administration in the integrated system, you and your staff will have more time to spend on more profitable activities, attracting new clients and continuing to provide a quality service to existing clients.

Enables your business to

- Provide product and benefit comparisons with ease for prospects and clients.
- Retrieve multiple quotes to provide customer choice.
- Automate quote workflows to eliminate rekeying of client, risk and policy details.
- Process renewals with ease through pre-configured workflows to quickly retain business.

Core Capabilities

Full-cycle comparative quotation and point of sale solution

Automatic production of electronic submission documents and schedules; bespoke solutions for real-time pricing and fulfilment; full integration with Applied Relay for policy accounting and administration.

Policy document management

Structured risk data collection; client policy documentation production; client proposals and schedules can be created quickly as no risk information needs to be re-keyed.

Product builder

Develop custom data collection screens; calculate premiums and apply endorsements; deliver to both desktop and online within your website.

22 classes of business available
